All of the quantitative and qualitative data is then combined into an overall 'Best Law Firms' score for each firm. Because firms were often separated by small or insignificant differences in overall score, we use a tiering system rather than ranking law firms sequentially. The number of tiers included in each practice area or metropolitan area ranking varies, and some specialties may not be ranked in metro areas in which there is not enough

data to provide rankings in a particular specialty.” A full description of the selection methodology can be found at <https://bestlawfirms.usnews.com/methodology.aspx>.
